

## ELSTER BOUNDARY METER BOXES

### AJUSTA

#### BELOW GROUND SINGLE METER BOUNDARY BOX

#### Part No. AJUSTA

#### SINGLE MANIFOLD BOX WITH 25mm MPDE TAILED CONNECTIONS HOUSES 1 1/2" THREADED (CONCENTRIC) METERS

The Ajusta is a fully adjustable boundary box which can be set to a wide range of screw-down heights, from 590mm to 800mm to fit varying service pipe depths without reducing rigidity. The boundary box has a height adjustment assembly, and with a disc lid can be used directly in the highway. The bayonet design means the box can be separated prior to meter installation, simplifying connection.

#### Other Options Available

Single Manifold with 20mm Inlet & Outlet Push-Fit Connections.

Single Manifold with 25mm Inlet & Outlet Push-Fit Connections.

Single Manifold with 3/4" BSP Male Inlet & Outlet Connections.

Mini-box version for shallower digs\*

\* Contact sales for dimension data

#### Contaminated Land Box Options

There are two options for contaminated land boxes.

1. Non-sealed box with a brass manifold and brass fittings. The brass material will not allow leaching of groundwater.

2. Sealed box with plastic manifold. Sealed boxes are 100% leak tested so that groundwater cannot ingress into the boundary box chamber.

MODEL	A (min)	A (max)	B	C
AJUSTA	590	800	200	200

#### Features & Benefits

- All materials which come into contact with water are WRAS approved.
- Complies to DWI regulation 25, Class 2RD.
- Five tonne load bearing capability.
- Supplied as standard with flexible MPDE tailed connections thus allowing easy installation & reducing potential leak paths.
- Built in stopcock & check valve.
- Height fully adjustable up to 800mm
- Angle & slope can be fully adjustable with optional adapter.

#### Pressure

Pressure range:-

Up to 16 bar.

Meters are not supplied with AJUSTA Boundary Boxes.

The Elster V210 Manifold water meter is available separately. See Data Sheet No. 01.03 for full details.
