BRASS ANGLED & STRIAIGHT PATTERN THERMOMETERS

SK1 (STRAIGHT)	SK2 (ANGLED)	A	B	C
SK1-174	SK2-175	30	110	30, 40, 63, 100, 160, 250, 400
SK1-291	SK1-292	36	150	63, 100, 160, 250, 400
SK1-271	SK1-272	36	200	63, 100, 160, 250, 400

The Sika thermometers represent the highest quality available in direct mounting industrial thermometers used in many applications.

The casing is V shaped, gold-coloured anodised aluminium. They are adjustable to any desired viewing position and locked by a brass nut. Angled thermometers have a grooved adapter piece with a set screw, the advantage for this is, when mounting the thermometer, it is not necessary to turn the casing.

The inserts are prismatic glass which are blue spirit filled (mercury filled over 200°C) and the pockets are brass with a 1/2 B.S.P. male thread as standard.

Features & Benefits

- Spirit filled accuracy to DIN16195.
- Mercury filled accuracy of approximately 1% of maxim scale value.
- Robustly manufactured for industrial use.
- Clearly marked for easy reading.
- Spare inserts, pockets & cases available.

STANDARD TEMPERATURE RANGES

-60 to +40° C&F	-30 to +50° C&F	0 to 60° C&F
0 to 100° C&F	0 to 120° C&F	0 to 160° C&F
0 to 200° C&F	0 to 300° C&F	0 to 400° C&F
0 to 500° C&F	0 to 600° C&F
