

AJUSTA

Adjustable Height Single Meter Port Boundary Box

The AJUSTA Single manifold meter boxes are buried, usually in pavements and walk ways. They are very competitively priced and are the most reliable box on the market, offering massive operational savings by having the least number of dig-outs and re-instatements.

AJUSTA meter boxes have unbeatable adaptability in the field, they have a screw down height adjustment range of 210mm allowing them to fit varying service pipe depths without sacrificing rigidity or the need to cut the guard tube on site.

The standard box has 25mm PE tails that allows for either compression fitting or reliable electro fusion jointing of either new or existing pipe work thus negates the requirement for "make-up" sections, which reduces potential leak paths.

Push-fit options are also available in 20mm or 25mm, ideal for new installations or to reduce installation costs via fewer fittings without compromising risk of leakage.

Features, Benefits & Approvals

- Pressure rated up to 16 bar
- Class 2RD (non-watertight, rigid tube)
- Complies WIS No. 4-37-01 & DWI regulation 25
- WRAS approved (wetted parts)
- 5 tonnes load bearing capability
- Integral stopcocks & non-return (check) valves
- Excellent visibility and access to both the meter and valve is provided by the surface box lid
- The most reliable box on the market – offers massive operational savings by having the least number of dig-outs and re-instatements and associated issues with the new Traffic Management Act

Contaminated Land Boxes

For use in sites where the ground could be contaminated. Please contact sales for further details

	Pipe Connections	Meter Connections	Stop Valve	Check Valve	A (min)	A (max)	B	C	Weight (kg)

V210 Honeywell Water Meter (Optional)

The Honeywell V210 volumetric water meter is designed to be installed into a manifolds, boundary and meter boxes that have coaxial concentric connections

QTA0167 Installation Key (Optional)

Designed for the easy installation and removal of V210 Honeywell water meters in boundary boxes.

Meters are not supplied with any Boundary Boxes and must be ordered separately
