Differential Pressure Options

ΔP

4.5 Bar • 10 Bar • 14 Bar

The JV160006 is a float type steam trap for draining condensate in steam lines. This steam trap is capable of draining large capacities of condensate and is well adapted to the changes of flowrates.

Used in many steam applications including heat exchangers, autoclaves and condensers.

Approvals, Features & Benefits

- Face to face to EN 26554
- Built-in thermostatic air eliminator
- Large discharge capacity
- Reliable performance
- Horizontal installation as standard

Pressure & Temperature

Max pressure:-

14.5 bar

Max temperature:-

0°C to 250°C
