

The JV160008 is a float type steam trap for draining condensate in steam lines. This steam trap is capable of draining large capacities of condensate and is well adapted to the changes of flowrates.

Used in many steam applications including heat exchangers, autoclaves and condensers.

## JV160008

Stainless Steel Float Steam Trap

Flanged PN25

Horizontal Installation (Vertical on request)

Differential Pressure Options  $\Delta P$ 

4.5 Bar • 10 Bar • 14 Bar

## Approvals, Features & Benefits

- Face to face to EN 26554
- Built-in thermostatic air eliminator
- Large discharge capacity
- Reliable performance
- Horizontal installation as standard

## **Pressure & Temperature**

Max pressure:-

16 bar

Max temperature:-

0°C to 250°C

| DN        | 15    | 20    | 25    |
|-----------|-------|-------|-------|
| Α         | 150   | 150   | 160   |
| В         | 108   | 108   | 108   |
| С         | 98    | 98    | 120   |
| D         | 136.5 | 136.5 | 148.5 |
| Weight Kg | 4.5   | 4.2   | 6.3   |

| MATERIALS                                     |                          |
|---|--------------------------|
| Body & Cover                                  | Stainless Steel (1.4408) |
| Thermostatic Capsule                          | Stainless Steel (304)    |
| Capsule Seat, Float Seat, Float Lever & Float | Stainless Steel (304)    |
| Ball  | Stainless Steel (440C)   |

## Flowrate of Condensate
