

JV-E
Electric 1/4 Turn
Johnson Valves Actuator
20Nm - 1200Nm

The JV-E electric actuator is designed for quarter turn applications on ball and butterfly valves with bases to ISO 5211 & DIN 3337 standard. Small, lightweight and compact in design but still offering high output torques.

Simple Installation

All connections are located in a separate terminal box, minimising the amount of disassembly required.

High Visibility Position Indicator

Making visual checks easy even from a distance.

Watertight Unit

IP68 Watertight (IP68 5m 120hr)

Efficient Design

High torques are achieved with relatively low power consumption.

Captive Bolts

Bolts will not be lost even when the cover is open.

Self Locking

The risk of overheating due to repeated operations is avoided with this feature.

Standard Specifications

Enclosure	IP68 Watertight (IP68 5m 120hr)	Travel Angle	90° ± 5°
Power Supply	110V & 250V (1PH) / 24VDC / 380V & 440V (3PH) ***	Casing Material	Aluminium Alloy, Dry Power Polyester Coated
Indicator	Dome Type Mechanical	Terminal Block	Push Button
Limit Switches	2 x Open / 2 x Close, SPDT, 250V AC *	Ambient Temp	-20 to +60°C
Inside Heater	(AC Only) 1PH 110/220V AC **	Motor Condition	Duty 40%

* not available on JV-E02 ** not available on JV-E02, 04 & 05 ***Only available for JV-E16, 28, 40, 50, 80 & 120
