The JRV2S is a compact direct-acting pressure reducing valve which is suitable for steam, air and neutral gases.

The valve has a built-in strainer and an highly durable bellows. The reduced pressure can be easily adjusted with thumbwheel.

The valve has to be installed in the horizontal position and it is recommend that an upstream strainer fitted.

### Approvals, Features & Benefits
- 3.1 material certification on request
- Alternative to Spirax Sarco BRV
- Direct acting
- Economical & efficient
- Built-in strainer
- Compact design

### Pressure & Temperature
- **Upstream Pressure range:** 16 bar
- **Downstream Pressure range:** 0.14 to 8.6 bar
- **Temperature range:** -10°C to 210°C
